## **Overviews of Our First Ten (10) Practical Solution Proposals**

**The following somewhat brief, yet informative descriptions of our first ten (10) practical, Public Solution Proposals. Prudent solutions that will positively assist struggling Citizens in every zip code in America. For additional details on these and 30+ other public problem Solutions, please see CommonSense2nd.com – the TIPA Independent Political Platform.**

**NOTE: On the day that every American never again needs to worry about having a decent place to live and regular meals, many other problems in our nation will fade away.**

### **HOUSING - NO MORE EVICTIONS EVER**

- There will be NO more Housing evictions in America thru 2021 – and then FOREVER!!
- The out-of-control and over-priced Landlord/Rental system will be Reformed.
- Problem Tenants and/or Landlords will be dealt with swiftly by the police and local courts.
- This proposal applies to all occupied residences. Owner Occupied, Rented/Leased, Mobile Homes, as well as Modular home developments.
- There will be a guaranteed fixed address for ALL Citizens.
- The U.S. Department of Housing and Urban Development (HUD) will be re-named. It will become known as the Department of Citizen Relocation (DCR). It needs to be reorganized.
- Lenders and Wall Street will support this public crisis and Housing Reformation.
- Missed mortgage payments will be applied without penalties to the end of any related loan; for both Owner Occupied and Rented properties. Lot Fees will be forgiven. This process will begin by January 1, 2021. Any Housing situations that can be covered and/or recovered from evictions in 2020 will be included. Families will not be in the streets or shelters!
- Responsible Landlords will have special re-financing options, such as, extended loan terms to reduce monthly payments.
- Public taxes will not be used to finance anymore missed mortgage, rental or Lot Fee payments.
- Taxes on any involved properties will be forgiven until the Crisis has passed on a given property.
- Insurance on any involved properties will be forgiven until the Crisis has passed on a given property.
- The Wealth Tax could come into play here. It is simple economic *common sense*!
- Re-employment will be aggressively coordinated and tracked by each State and major City. Relocation for employment will be aggressively promoted, with the help of HUD.
- Anyone Tenants found playing the system, as there certainly have been and will be, will find themselves living in tents for a while. And abusive Landlords could lose their properties!

**And finally, regarding the Police!** The nation’s police unions are challenged to actively support the “No Evictions” policy of this program. The Police will no longer be utilized to evict

people from their residences. And will not carry out court ordered evictions. They will stand with the People. Thus, improving their public image and appreciation.

### **Utilities – Will not be turned off**

Utility Corporations will support Home Owners and Landlords

- Lenders and Wall Street will support this public crisis
- Landlords will have financing considerations
- Public taxes “may” help finance Utilities
- The Wealth Tax will come into play

### A Message Directed to Lenders, the Banks, Wall Street, and Landlords

Frankly, this is difficult to put into words.

This proposal Demands the Lenders be very accommodating to those that have, are, and will be unable for some period of months to make monthly mortgage payments. In some cases, possibly through the entire year of 2021. This not only affects Owner Occupied properties, but rented and leased properties, as well. Properties types including Modular and Mobile homes.

In all cases, Lenders are challenged and required to place any missed payments on the end of the applicable loan and without late fees. No matter how many payments are involved. This could well result in some financial losses to those institutions in 2021.

States and the US Congress have done whatever they can to protect Lenders in these situations in 2020, including having taxpayer funds used to make missed mortgage payments. This practice must end immediately. And Lenders must accept losses in this COVID19 induced financial crisis. Just as restaurant owners are suffering from customers that cannot use their services have suffered terrible losses, if not gone totally out of business. The Lenders must accept some pain in the national financial crisis. Yes, they will be hit, but will not be crushed.

In the horrific 1929 Crash and for some years thereafter, Banks routinely threw People/Families out of their residences for non-payment. Landlords did the same. American families were in the streets, roaming around the nation looking for jobs and housing, while many properties sat totally empty.

That dark history cannot and will not be repeated or allowed in 2021. The Financial Industry will be required to take losses and accept some of the pain of this national crisis. We the People, bailed you out in 2008/2009 in a crisis that was much of your own making. You are expected to respond accordingly in this period of national struggle.

The same message and expectation is made relative to vehicle loans and Modular Home Park Lot fees that can run hundreds of dollars per month.

Housing security, just like Food security is critical a person’s and/or a family’s mental welfare. Just as in the 1929 Crash, forces beyond the control of the average American crushed the Masses. Losses responsibly assumed by the Financial Industry in this situation will protect our People and will actually help bring a faster end to this financial crisis. This support without taxpayer bailouts is now Expected! AJW

## **FOOD - GUARANTEED 3-MEALS FOR ALL**

- Guaranteed Food for all Citizens. And that means 3-meals-a-day from local stores not food banks.
- Very few of the many people that I have spoken with about this Reform approach were opposed to it. The ever-increasing cost of groceries is killing family budgets and literally starving people of all ages. Many folks just wanted to be sure that the farmers are taken care of! They will be. And corporate farms will be controlled.
- Local Food access and affordable pricing will be required. Prices have been out-of-control and have only worsened in 2020. Greed!
- GROCERY PRICES WILL BE CAPPED – ASAP – FOR THE PUBLIC GOOD!!!
- No more Food Deserts anywhere
- The vast majority of grocery stores with the exception of chains such as Whole Foods will be prudently converted into Commissaries, as are successfully utilized in the military
- The Food Industry overall will soon become operated as a Public Utility. We regulate the cost/rates of Public electric, gas, water, etc. If we did not, people would not be able to afford them. Everyone needs utilities to live on their homes.

Therefore, it is time for the long-overdue regulation of Grocery/Food prices. It only makes it possible for Americans to afford to buy Food. You know, to eat...

- Stockholders will be bought-out over multiple years
- The Wealth Tax will come into play in this conversion, as needed.

## **NO VEHICLE SEIZURES THRU 2021**

- Real simple. If you can't get to work – you can't work!
- Thus, through at least 2021, no primary “get to work” vehicles will be taken.
- Multiple other vehicles will not necessarily be protected
- Missed vehicle payments will be applied to the end of any related loan and without penalties
- Re-employment aggressively tracked and promoted by each State
- Again, Re-employment will be aggressively supported and tracked by each State and major City. Further, relocation for viable employment will be aggressively promoted, with the help of HUD.

## REFUND CUOMO'S \$3.20 COVID OVERCHARGE

- This is the proverbial tip of an enormous taxpayer abuse iceberg.
- The American Press in all 50 States (and DC) is challenged to document and oversee this financial reconciliation process – NOW! And not in another year or two (2) via the courts, once the US Congress wakes up! Vendor level details need to be published and tracked in print and online for the Public to observe.
- Terms like “*Windfall Profits*” and “*Wartime Profiteering*” are all too applicable.
- My phrase “*Refund the CUC*” means for vendors to be required to refund *Covid19 Unit Charges (CUC)* and specifically the overcharging on all Medical Supplies and Services (MSS).

Here is our primary and real example of this abuse. It is taken from one (1) of Governor Andrew Cuomo’s first daily Press conferences back in March. He held up a vendor invoice and said, “The last time we ordered this particular item the unit price was **80 cents** (\$.80). Today the unit price is **\$4.00**”. Thus, the abusive CUC overcharge was **\$3.20 per unit**. A **400% markup**, just because they could get away with it!

Imagine such a CUC multiplier times tens of thousands of units. It easy to understand how States, Hospitals, FEMA, etc., budgets have been destroyed since March 2020. State budget impacts have already caused the furloughs and lay-offs of well over two (2) million State and Local employees. This money must come back!

The White House Administration stated in March and on camera for the States to get their own medical supplies and they would be reimbursed. As of late December that has proven to be a lie. They did not effectively implement the Defense Production Act (DPA) to cap costs, corporate profitability or to direct production of critical supplies. The ultimate Dark Side of the Supply and Demand process kicked in and vendors have had a field day jacking up charges for Medical Supplies and Services. Obscene corporate behavior across the board!

- The People Demand mandatory and immediate reimbursement by Vendors of all CUC overcharges.
- The new White House Administration must aggressively implement strict Defense Production Act (DPA) cost controls thru the remainder of the COVID19 pandemic.
- Implement absolute control over prices and production thru pandemic for Medical Supplies and Services.
- For example, with the Pfizer 2-shot vaccine, to vaccinate some 330,000,000 Americans it would require at least 660,000,000 vials. And requires specialized refrigeration. With a Worldwide population of about 7.8 Billion at least some 15.5 Billion vials. The Moderna vaccine requires one shot and vial and regular refrigeration that makes it more practical in more rural areas. In either case, follow the money...
  - Who makes the vaccine vials?
  - What was the 2019-unit cost of a vial? What are they charging now?
  - All those vials should be re-cycled. Is that happening?
  - Also, what was the cost of those specialized refrigeration units a year ago!? How much we being charged for them now.

- My fellow Americans, this is a war and We the People we are being grossly overcharged! It must and will not stand!!
- No prosecution of Vendors, IF, the CUC is refunded by 3-31-2021.
- Go get them American Press.

## **“SAVE THE TRUCKERS” JOBS**

- We Demand the suspension of the Artificial Intelligence (AI) technology-based automation of trucks. Basically, shelving development of the driverless tracker trailers that are already being tested at 60 miles an hour.
- There will be an absolute Prohibition against Automated Intelligence (AI) Trucking.
- It will rightfully preserve over two (2) million Large truck driver jobs cannot be replaced.
- Trucking manufacturers could/should seek Electric powered vehicle options to reduce costs.
- We will use preventing this corporate assault on our nation’s truck drivers as an example of when AI will not always be allowed to eliminate jobs for the sake of corporate profits.

## **NOT UN-EMPLOYMENT - RE-EMPLOYMENT**

- We will rename the Unemployment Departments in all 50 States and DC. They will become known as the **Department of Re-Employment (DRE)**.
- All persons receiving Housing, Utilities, and Vehicle financial considerations (as described above) during 2020 and 2021, will be required to register with their State’s Social Services immediately.
- All persons will be required to actively work with State Re-Employment and private services, such as *Indeed* to find re-employment. Objective is to start at least part-time employment ASAP, if not immediately.
- Those receiving Unemployment compensation will be available for part-time work within their local jurisdictions.
- Job re-training as needed, will be mandatory and immediate!
- The DRE, will begin to aggressively promote the potential re-location of individuals and families to areas and even other states where workers are needed. Assistance with relocation and Housing coordination will be provided, as appropriate.
- This proposal includes those that are somewhat intellectually and/or physically challenged, whenever possible. Many of those folks are currently working part-time jobs thru groups like ARC and CHANGE. They are proud to get their checks on payday!

NOTE: The state-to-state individual and family relocation process will be developed and refined. Some years into the future as Climate change becomes a hard national reality, such coordinated relocations will become an absolute necessity. Such as when Florida’s 22 million people, ALL need to be relocated. More on that little problem soon.

## **SUSPEND ALL IMMIGRATION – START NATIONAL ID**

There are parts in this proposal for Conservatives and Progressives/Liberals to both love and hate! So, everybody needs to take a deep breath and get over it. The vast of Americans are sick and tired of the illegal invasion of national borders.

- The vast majority of the American public are in favor of what you are about to hear or read! America has the most routinely violated national borders in the world. And that deliberate abuse of our immigration laws will be brought an immediate halt! Enough is too much...
- Frankly, the majority of American are sick and tired of illegal immigration no matter what sad story is attached to it!!
- For a long overdue change, US Immigration controls against all illegal entry will be strictly enforced – immediately and going forward, permanently.
- Effective immediately in 2021, ALL illegal immigration, especially by those from South of the US/Mexico border will be rejected, no matter why, including:
  - Oppressive governments in home country
  - Political refugees of any kind
  - Natural disasters
  - Drug Cartel threats
  - Physical assault threats and/or occurrences in their home country
  - Family threatened by whomever
  - Children arriving with or without parent(s)
  - No pregnant women
  - Any baby born to illegally entered women will NOT be given citizenship in the US. The planned and deliberate “border baby – anchor baby” game will be ended. The 14<sup>th</sup> Amendment will be modified to certify the Public’s preference.
  - Poor living conditions, including Housing and Food shortages
  - And any other reasons/excuse(s) that have been used to enter our country without proper legal filings, **in advance!**
  - All of those restrictions against illegal entry into our country, will be made permanent.
- All legal immigration will be suspended until at least through the COVID19 pandemic is conquered. This immigration Suspension will be continued thru the year 2022.
- The only possible exception to be considered is for people with specific and specialized skill sets. And those situations will require pre-approval to gain entry.

And finally, America will implement a standardized National Citizen ID System. Just like 95+ percent of the world has. All Americans will be registered and receive unique Citizen ID. Again, just as almost every other nation in the world has utilized for decades, including Mexico.

- A detailed once and for all reconciliation of existing Illegal Occupants (IOs) currently physically within our country will be conducted at the same time, starting in 2021. Some will be allowed to stay and some will be sent back to their home country i.e., deported. Those

that are allowed to stay will not necessarily ever be granted US Citizenship. That remains to be worked out.

- These restrictions against IOs will remain permanently in effect. We will aggressively and without exception continue this policy. From 2021 on, the ability to enter and stay in the US will be by official invitation, only.
- Before we will waste any more Public tax dollars on persons that do not belong here, every American citizen will have:
  - Guaranteed Housing cradle-to-grave.
  - Guaranteed Food Access cradle-to-grave.
  - Guaranteed Health Care cradle-to-grave.
  - And whatever Employment that they are capable of doing.
- Starting as soon after 1-1-2021 as possible, America will no longer be a dumping ground for the excess population of other nations.
- Expect no apologies for this prudent and practical National Immigration Control Policy. We will not be offering any of them!
- As previously stated, America has the most routinely violated national borders in the world. This national abuse will now end.

## **CANNABIS A LEGAL SMALL BUSINESS ONLY**

- It is about time to get this done!
- Just as in Colorado, Cannabis must and will become a State-level controlled small business operation – ONLY! It will provide decent paying jobs for Entrepreneurs and the local populations.
- It will also provide very needed taxes for State to fund important public services, *instead of* providing annual dividends for stockholders and compensation for corporate executives.
- Wall Street and investors are now lined up to secure control over the legal Cannabis business for fun and profit. This must and will be stopped. Sorry folks, a bad investment.
- In the mid-1930's Cannabis and its cousin plant Hemp were politically made illegal. Since then, there are two (2) Big Industries that have covertly and overtly lobbied hard against its legalization.
- Number 2 is the Alcohol Industry, because they will lose some of their market if people have legal access to Cannabis. Simply because if people can smoke Cannabis, they will drink less booze. A widely-known fact.
- But, the Number 1 lobby against Cannabis by far is the Pharmaceutical Industry. Because Cannabis' natural THC and CBD medicinal properties will really hit their business and so their profitability. Cannabis is one of the world's oldest natural medicines.
- It is also widely-known that if hard drug users have easy access to Cannabis, they will use less hard drugs. And some will never start using them in the first place. And less alcohol!
- Again, please see [www.CommonSense2nd.com](http://www.CommonSense2nd.com) for far more detail on Cannabis and its cousin plant Hemp. The Truth will set it free...

## **RECYCLING FOR JOBS & MANUFACTURING**

For practical reasons in the near and long-term, Recycling of re-useable products needs to be become mandatory in America. Please consider the following points.

- Currently, not all Americans and not all localities are urging people to recycle everything that they can. Mainly because some people consider it to be a nuisance. However, aggressive Recycling is a key factor to our economy in both the near and long term.
- It will create more far more collection and processing employment across the country. And so, the construction of multiple full function Recycling Centers in all 435 US Districts.
- Those Recycling Centers will create raw materials for domestic manufacturing. Creating products that are currently produced in other countries and imported. It will help decrease the Trade Deficit.
- Re-use of materials such as paper products, glass, plastic, metal, etc., will greatly extend our planet's *limited* natural resources.
- The Recycling Centers will also produce raw materials for future construction of homes and businesses. Once they are in place, they will be a natural recipient of the destruction caused by tornados, hurricanes, severe storms, and other natural disasters.

### Now About the Climate Thing

And finally, let's put on our national, if not international Futurist planning hats for a few minutes, folks. This will provide a hard perspective on the Responsibility that we have Today for the generations that will follow us.

“Reliable” climate scientists around the World, have determined that by around the year 2100, most if not the entire State of Florida will permanently be in standing water! THINK about that reality for a sobering moment. Florida's star will be physically removed from the American flag because it will be gone... That is not intended to be funny!

That simply means that well before the next 80 years have passed – we have some serious building to do folks. A gargantuan demand for construction of all types. The Demand to expand existing towns and cities, as well as to create entirely new cities. Massive construction projects in order to practically relocate the 22+ million Americans now living in Florida. Please quietly consider that the city of Atlanta, Georgia has a population of about 480,000 people.

Simple math says we will need to build some 44 cities the size of Atlanta, “just” to deal with relocating Florida's population. Let's see the Fossil Fuel Industry hide from that Truth.

And after we get done doing that, we still need to relocate tens of millions of Americans living along the Eastern, Gulf, and West coasts. Rising water takes no prisoners.

That is a biblical volume of building materials. Something to seriously ponder about folks. Thus, a focused national Recycling program is not only a good idea – it is a brutal necessity.

Enough said on that for now.

## **MANDATORY MILITARY SERVICE – MEN & WOMEN**

**Yes, that is for both men and women!!**

Depending upon who you talk to this is a good idea or not. The majority of those I have asked, and there have been many, believe it would be a great idea.

- The American Selective Training and Service Act was enacted in 1940. It was commonly referred to as “*The Draft*”.
- Rightly or wrongly, it was ended in January 1973 with the end of the Vietnam War. Some 47 years ago. Thus, two (2) generations of American men did not go through the two (2) years of military training and experience.
- To my analysis and personal opinion, this was one of the worst decisions made in our nation in the last 50 years. And has produced terrible social and economic consequences.
- The standard two (2) year obligation for all males in the population frankly made men out of boys. They came out disciplined, motivated, often trained in some basic skill(s), and they had mixed with other men in their own age range. Men from farms, cities, the coast lines, and the heartland were thrown together for two (2) years. They learned how to interact with men different from themselves in background, locality, race, religion, etc. Learned to appreciate and accept people different from themselves in many ways.
- My observation is that the ending of the Draft directly contributed some 47 years later to the increase problems in race and other relations that are issues today. I remember the 1970’s and race relations as I had experienced them in the Baltimore and Washington areas was rather peaceful. Not perfect of course but people got along after 3 ½ decades of the shared Draft experience.
- All that said, we need to reinstate the Draft, as soon as possible. Not to build a military for foreign wars, but to promote civil structure and human understanding within society. And to build a better future work force, frankly.
- This time however, it should include both men and women. The Service term would be one (1) or two (2) years.
- The first three (3) to six (6) months would be standard military training. The remainder of the Service term could be used for educational training such as a GED for those that did not finish High School, for vocational skills training, and domestic infrastructure construction. Not to mention those **44+ cities** for future citizen relocation.

This is an extremely prudent and practical program with many near and long-term Public benefits. Give it some thought.

## **THOSE ARE OUR FIRST TEN (10) SOLUTION PROPOSALS**

That, my fellow Americans is an overview of the set of practical problem-solving proposals that the vast majority of We the People not only want, but our society and economy Demands.

Again, please see CommonSense2nd.com for details on those and 30+ additional Public problem solutions.

## **A Perspective on Space**

### **MARS is Not an Option for Humans**

I admit it may seem a bit out of place, talking about going to MARS and our “theoretical” new planetary home somewhere out in Outer Space, when we are discussing important national economic reforms, but it is not. So let’s take a look.

For many years, we have heard talk that someday the people of Earth would climb into our rocket ships and head for our new home planet before Earth’s failing environment totally collapses. It will of course need to be same type of planet we are living on now. For some years now, scientists the world over have been searching for that proverbial needle in a very large cosmic haystack!!

This particular piece has more to do with, “Why we should not go to Mars” than anything else.

#### **We Cannot Live on Mars Anytime Soon or Probably Ever**

So here is a quick reality check on the strange push to go to Mars. Strange for a few practical reasons:

1. For starters, at current rocket speeds Mars is some 300 days travel and about **42 million miles** from Earth.
2. Next, the atmosphere of Mars is one-tenth (1/10) that of Earth. That makes it all but impossible to land there. Even for the basic robot landers we have already sent there. Vehicles far lighter than a manned space craft.
3. Also, since the atmosphere is so thin it cannot shield the astronauts from the severe radiation that constantly bombards the planet. NASA is working to develop a barrier to shield whatever facilities that would be used to house the astronauts on Mars. To be determined.
4. Next, the surface environment of Mars is basically uninhabitable. At least as far as human beings are concerned. The only option could be for astronauts to inhabit old, underground, empty lava tubes.
5. Next, the basic “ground or dirt” on the surface of Mars is extremely toxic and poisonous to we humans.
6. Also, there is secondary “dust” of sorts that is blown around the entire planet. At times, it storms so hard that it can blot out the sun for long periods of time. That substance is also somewhat ‘sticky’. For example, it would coat solar panels required to provide energy to the Mars colony. A real problem!
7. Our Moon has far less dust, that sticks to astronaut space suits and equipment.
8. Also, there is no drinkable water on Mars. The frozen north pole of Mars could be melted, but it would then require adequate filtration to remove the dirt and dust that must be in it. NASA’s one thought at this point is to actually ship water to any colony on Mars. So very

cheap and convenient don't you think? Of course, if a shipment does not get there – they die...

To be clear, I have always personally appreciated NASA and our nation's Space program. The Moon would be a practical place to practice building a colony or whatever and keep NASA busy.

I do believe that the first manned voyage to MARS will most likely become a one-way, suicide mission. And that grim reality is discussed within NASA.

### **Space the Final Frontier – How Far is a Light Year?**

I have always been fascinated with the size and enormity of Space. It is far grander than our little minds can comprehend. Here are some of the basic numbers.

How fast is the Speed of Light?

The Speed of Light is 186,282 miles per second.

How far is a Light Year?

A Light Year is traveling for one (1) full calendar year (365 days) at the Speed of Light.

Light travels approximately 6 Trillion miles in one (1) year.

That is, 6,000,000,000,000 miles.

Let's say for example, we found a Star/Sun that had an inhabitable planet. And that it was only one (1) Light Year from Earth.

The hard reality is that at the current state of our rocket technology it would actually take approximately 70,000 years to travel that one (1) Light Year. Yes, I said seventy thousand years.

Again, just going 42 Million miles to Mars takes about 300 days...

o o o o

## **The Public Policy Baseline for Our Economic Reformation**

### ***“We Americans Cannot Remain a House Divided Against Itself”***

This presentation of American Economic and Social Reformation is not for the faint-of-heart. It was not developed to please the hard-core economic Conservative nor the bleeding-heart economic Progressive/Liberal.

This was not developed to promote the *Hope* and/or *Change* that have been the political catch-phrases in years past. It is about **Reformation** within various critical parts of our broken American Economic and Social Systems. The dictionary defines the verb “**reform**” as,

***“Make changes in (something, typically a social, political, or economic institution or practice) in order to improve it.”***

Some years ago, a major corporation had marketing program with the following slogan,

***“The System is the Solution”***

As a professional Systems Analyst and Designer, my response to that is,

***“Then, obviously the Existing System is the Problem”***

The prudent and practical development of Solutions to Public problems, runs into the following hard reality, as observed by *Albert Einstein* commenting that,

***“A Problem Cannot be Fixed by the Same Consciousness the Created It”***

That means that there is too much “group” investment and benefit found in perpetuating a now dysfunctional program. Thus, enough of the “group” is motivated to maintain the *status quo* rather than replacing the functionally deficient program. One (1) of the best examples of that in American is broken National Health Care System.

o o o o

To further emphasis the true need for the Public’s private consideration of these proposals, here are the opening words from Thomas Paine’s revolutionary pamphlet, *Common Sense* (January 1776),

*Perhaps the sentiments contained in the following pages, are not YET sufficiently fashionable to procure them general favour; a long habit of not thinking a thing WRONG, gives it a superficial appearance of being RIGHT, and raises at first a formidable outcry in defense of custom. But the tumult soon subsides.*

***“Time makes more converts than Reason”***

Therefore, my fellow Americans please consider those first ten (10) practical Proposals in the Our American Economic and Social Reformation. And what will come to be known as Our Third and Final American Revolution...

o o o o

**In Closing**

That is all for now, folks. We do now have viable, workable, and most importantly Publicly acceptable solutions to critical problems.

We the People, must now Demand that the new White House Administration and the dysfunctional US Congress get busy and implement these desirable proposals. And do now and over the objections of serving Industry lobbyists.

If Congress does not or will not, 2022 will see many of them sent home and looking for **Re-Employment...**

**I pray for good health for you and your loved ones.**

**And, may God continue to bless the United States of America!**

***A. J. Wildman***
